

## SEMI-FOREST LINE

# SS/CL

## SKID STEER FLAIL MULCHER

- NO DRAIN LINE REQUIRED -

SS/CL is a flail mulcher for very demanding customers, for very hard and intensive uses. It can cut grass, branches and dense vegetation until 9-10 cm diameter. Thanks to its design SS-CL can be used for every type of mulching, infact with the frontal opening door the machine can cut vegetation with height more than 3,0 mts. The rotor is build with a very strong steel tube, with thickness of 12,5 mm on CL 150 and 16mm on CL 180. The hammer are really heavy (2,0 kg about), so the big impact against the vegetation give a very high cutting performances, infact the SS-CL needs to be coupled with High flow skid steer.

### STANDARD EQUIPMENT:

Frontal opening door, pressure gauge, rear adjustable roller, lateral skids, electro-hydraulic system with Deutsch electric 8 Pin plug (or 14 pin depending from the skid steer model). Adaptor hitch plate, double counterblades rows made in Hardox 400, Hoses with Flat quick release coupling. 3F main valve (3 function valve / by-pass / antischock / oil flow divider pre-setted in Osmas factory).

### Technical information

| Model     | Code   | Cutting wide cm.<br> | Weight kg.<br> | Flow rate lt/min<br> | Required power HP<br> | Pressure set bar<br> | Tools nr. |
|-----------|--------|---|---|---|---|---|-----------|
| SS-CL 150 | 810150 | 150   | 790   | 50-90   | 70-90   | 210-230   | 12        |
| SS-CL 180 | 810180 | 180   | 980   | 80-120  | 70-100  | 210-230   | 16        |

### Tools

Heavy Duty Hammer for grass, branches and wood up to 10 cm.  
Code ZP0007 - Rotor M

### Optional

Floating linkage bracket
