FORESTRY MULCHER FOR SKID STEERS LOADERS

| | | |
|------------------|--------------------|-----------------|
| 550 - 620 Kg | 50 - 70 lt/min | Ø max 15 cm |
|------------------|--------------------|-----------------|

Forestry mulcher designed to work skid steers loaders with power from 40 to 60 HP. Sturdy structure with Hardox steel in the points of greatest wear ensures optimal durability even in the most difficult environments. A high flow system is not required for correct operation. Cut the material up to a diameter of 15 cm. CE certified. Supplied with hydraulic hoses, length 2.00 m. Fixed tools rotor with Cobra Tools and DCR system to limit tool consumption and reduce consumption. Equipped with mechanical puller, 3F osma flow limiting valve, anti-shock and anti-cavitation. Counter knife system inside the paper case for perfect shredding of the material. Chains and protective rubber on the outflow of the shredded material. Without opening front door Fixed displacement piston engine 25 or 34 cc (130 - 150). Pushing frame as standard.

Technical information

| Model | Code | Cutting wide cm. | Exterior width cm. | Required power HP | Weight kg. | Flow rate lt/min | Pressure set bar |
|------------|--------|----------------------|------------------------|-----------------------|----------------|----------------------|----------------------|
| SSK-RT 130 | 990130 | 130 | 152 | 40-50 | 550 | 50-65 | 250-300 |
| SSK-RT 150 | 990150 | 150 | 172 | 50-60 | 620 | 65-70 | 250-300 |

Tools

COBRA Sharptooth 180° reversible (2 sides)
for grass and dense vegetation
DCR rotor with disc limiter

Optional

Model Q fixed tooth rotor, with DCR, for areas with a lot of stones and rocks
